

COMMON QUESTIONS

Is it safe?

Vibroacoustic sessions are gentle and non-invasive. Your practitioner screens for a few conditions beforehand and adjusts the session to you. You stay fully clothed throughout.

What will I feel?

A soft, low vibration through the surface of the bed, alongside calm music. Many people describe it as deeply settling. You simply rest.

How long is a session?

Typically 30–60 minutes. Your practitioner will recommend what suits you.

Resonabed

Ask your practitioner about adding a vibroacoustic session to your visit.

Clinic details:

VIBROACOUSTIC THERAPY

Sound you can feel.
Rest that goes deeper.

A CALM SPACE TO UNWIND

WHAT TO EXPECT

- 1 A short check-in**
Your practitioner asks how you are feeling and about a few health details, then tailors the session.
- 2 Settle onto the bed**
Lie back, fully clothed, and get comfortable. Nothing is asked of you but to rest.
- 3 Sound and vibration**
Gentle low-frequency tones move through the bed while calm music plays, heard and felt together.
- 4 Ease back gently**
When the session ends, take a moment before you rise. Many people feel unhurried and calm.

A natural add-on

A vibroacoustic session pairs beautifully with massage or bodywork, a calm way to finish your visit.

WHAT IT IS

Music, felt through the body

Vibroacoustic therapy delivers low-frequency sound as gentle vibration through a specially designed bed. You don't just hear the music. You feel it, softly, moving through you as you rest.

It's a simple, passive experience. You lie down, fully clothed, and let the sound and vibration do the rest. No effort, no technique to learn.

A VERY OLD IDEA

Sound has soothed us for thousands of years

Long before speakers and screens, people turned to sound to calm and restore. Ancient cultures used chanting, drums and singing bowls in their rituals of rest and reflection. Across the world, the low resonance of the didgeridoo, the hum of Tibetan bowls and the tones of the gong have been woven into practices of stillness and ceremony.

The thread running through all of them is simple: certain sounds, and the vibrations they carry, help the body and mind settle. It's an instinct as old as music itself.

Vibroacoustic therapy carries that ancient idea onto a modern, purpose-built bed, where sound isn't only heard, but felt.

WHY PEOPLE COME BACK

A different kind of calm

Everyday life keeps the body switched on. A vibroacoustic session is an invitation to switch off: to lie still, feel held by gentle sound, and let tension unwind at its own pace.

Deep relaxation

A quiet, unhurried experience that many find profoundly settling.

Stillness for a busy mind

Sound and vibration give the mind something soft to rest on.

Time that's just yours

Nothing to do, nowhere to be. Simply rest and be looked after.

Suited to nearly everyone

Because you stay clothed and simply lie down, it's an easy, accessible way to relax, including for those who prefer a gentle, hands-off experience.

Simply rest

There's nothing you need to do to "get it right." Lie back, let the sound move through you, and let your body find its own calm.

THE EXPERIENCE

Tuned to how you feel

Each session is built around a chosen tone. Your practitioner selects one to match how you would like to feel, from deeply grounded to lightly serene, and the music and vibration are shaped around it.

● 174 Hz	Grounding
● 285 Hz	Renewal
● 396 Hz	Release
● 417 Hz	Change
● 528 Hz	Harmony
● 639 Hz	Connection
● 741 Hz	Clarity
● 852 Hz	Stillness
● 963 Hz	Serenity

Not sure which is right for you? Your practitioner will help you choose, and you can try a different tone next time.

Resonabed offers vibroacoustic sessions for relaxation and general wellbeing. It is not a medical treatment and is not intended to diagnose, treat, cure, or prevent any medical condition. If you have a health concern, please consult a qualified healthcare practitioner. Sessions may not be suitable for everyone; your practitioner will discuss this with you.
